

Individual Style & Taste

East Meets West

Stevens Road

This luxurious pan-Asian residence was created with East-West influences to reflect Singapore today. The interior is both modern and classic with the display of traditional Chinese (blue and white porcelain paired with Asian contemporary art. Every single piece of furniture was custom designed. Traditional Chinese cabinets are modernized by making them in gold-plated steel instead of timber. Using tropical Asian fibres like bamboo wallpaper counterbalances the look of the master bedroom, whilst the collection of Chinese contemporary art is shown off

to perfection against the shimmering tangle rose (gold) wall in the family room. Eastern influences include the Lalique-like lapis gold panel that separates the living from the private lift lobby to highlight the modern classic Asian interior. Even Louis Vuitton-like bedside chests in the master bedroom are used in light of Asia's admiration of this brand's quality and prestige.

Carlene Woo Design

Mix traditional and modern design elements, furnishings and art pieces to create that special blend of East-West look.
